This game is the best 'hacking' game i have played so far! When youre playing this game, it really feels like you have become a mi7 agent. I would suggest buying this if youre into hacking and being a detective. I would recommend not using a guide :)

Have fun!

9/10!. ok, worth a bit of time, dev took the time to add a card/badge set. and make the game at least playable and an alright experience. not a bad thing for the price-point.. Really good surprise, I saw a video on Youtube while when I was looking for original platformers and wanted to try the free game (Crazy Dreamz : Magicats Edition) and I have to say I didnt expect to have that much fun ! So I decided to get the Best of edition and it was a good decision, I'm really enjoying it. Tons of different levels you never get bored.

If you like innovative platformers, this is the right game ^^. Good game and addictive. One of my favourite games in VR is Holoball and I must say this is running it close.

Like the overall feel of the game and the sound fits it well. Well worth the entry fee.. Earned my dollar back within the same week by selling my trading cards. Whow. What a game. An exauhsting challenge. And it leaves a deep feel good feeling upon completion. Well, for me at least.

So, in this game you play as the extremely lovable character Cerdocornico. You shoot space bugs and die very easily. This game is very hard. The game features a strange mechanic that has you jump and shoot at the same time. It's not like I spend all my awake time playing games, but I'd say it's pretty unique. It takes a while before you see any variation in enemies but that doesn't matter much. The sound effects are pretty fun. Try enter a wrong password.

Is it worth it's price? I don't like the valuing games for their price. Games should be valued for their story, for their gameplay, for their originality, for their ingeniuty. And I will say that this game has those.. A great game if you need an excuse to break your keyboard.. ez skinz ez lyf. I will update my review as changes are made because I do hope for so much to come out of this game. But as it stands i cant recommend you pick up this game not for 50 dollars not even at 30 if you can get it for 25 then and only then would I recommend.

Pros: track rhythm is nice and custom tracks are a great addition, cornering is nice bike customization is great.

Cons: bike setup does next to nothing and at the moment the best setup is -3 on all suspension every real rider understands how broken that is, lack of bike graphics all kits look identical and close to stock, multiplayer is a absolute disgrace coming in as the buggiest multiplayer of the series, in multiplayer the lag is unbearable and collisions are insane if you are minutely touched from the back from the plethora of idiots that race around just to smash into people you will fall off your bike, you will disconnect from every server, you do not have the option to open a private server to the public, you cant use the animated outfit that is hard to earn, training is tedious and does absolutely nothing to better your rider just avoid it, they've taken a step back from mxgp pro in air physics scrubs and kick offs are horrible slow messes that do not help what so ever they also are scripted where mxgp pro made you feel they were usefull and you had control. Also time attack does not record your time 9/10 of the time which is one of my favorite things to do rendering it useless.

So much wasted potential after the previous game i had hope but unless there is a rework helping with these issues i cannot recommend this game and as you can see with my time played I've given it a hell of a shot.. One of the few "Air combat" games that offers a range of handling characteristics, conforming to both the pick-up-and-play style, and the simulation expert style, while still pulling off an extremely solid core gameplay experience.

Wings of Prey offers everything from grand missions that retrace the course of history and take you through the battles of WW II, sometimes making you feel like you're really fighting alongside fellow pilots. To excruciating detail in the game's design and absolutely stunning graphics that bring the whole picture together into one fantastic package.

Truly a beautiful game, with very solid gameplay, and plenty of options to suit novice pilots a flight sim veterans alike.

Best choose in fight with depression. So casual.. Some limitations with the free account, but there is a lot of customizability with the car appearance wise (not model-wise). If you want a realistic racing experience, this is not it. If you want a wacky arcade racer, then this is one of the best. It still has a lot of servers running. There are a lot of cool puzzle racing maps people have made. You can have massive races. Also theres a more traditional single player. Cheers to TrackMania.. This game is fantastic, the combat style, the graphic, the badassery, the school days feeling and the fact that you're almost free all around and can actually become a loser is quite hilarious lol, this game is just truly amazing, well done Yeo!. can not connect to servers... cant even see what is all about. i dont expect it to be any good with a greeting like that. Fun game with some and few jumpscars. I think it should win for best enviornment because the graphics look good. has lots of world in it and their is a lot of sex. Don't get me wrong, this game is good. But please update it so that you can turn the sound completely off. This game is seems more for chillin' with music. But I can't do that with the low buzzzz of the plane in the back. It just needs a few updates. Like, being able to turn the sound completely off, able to get the gun on round 2, and being able to turn the words the right way, it's hard when you have dyslexia (like me). Game's good, just a few updates to make it nice.
